What is a kempower distributed charging system?

Kempower Distributed Charging Systems are tailored to your needs. The Kempower Power Unit's rack-style structure allows individual cabinets to be furnished with 1-4 power modules, each providing 50 kW of charging power capacity in 25 kW granularity. With single-, double- and triple-cabinet options, each Power Unit can support 1-12 charging points.

Do you use a specific non-European standard for electrical-cabinet construction?

Upon request, we can also use specific non-European standards for electrical-cabinet construction, because our international team would be happy to assist you with projects around the globe. Not only the manufacturing of electrical cabinets is important in Electrical-Cabinet Construction.

How many charging plugs can be connected to a kempower power unit?

Connect 1-8, and soon MORE, up to 12 charging plugs, Kempower Satellites or other charging dispensers, to a 600 or 1,200 kW Power Unit. Each Kempower Power Unit features a unique Power Distribution Module that increases utilization rate, maximizing ROI.

We construct control cabinets, power distribution cabinets and feeder cabinets according to our designs or external specifications. Compliance with common European or also non-European ...

New forms of competition expected in areas that at the moment are of limited or only emerging importance to the power sector (smart solutions, local energy systems, e-mobility, distributed ...

The Path to a Highly Available Core Site Meeting the expectations for constant availability while minimizing operational cost is key, whether you need DC back up for 12V, 48V or 400V power. ...
