Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.

What is the ASEAN electricity transmission report?

The 1 st edition of the ASEAN Electricity Transmission Report will analyse the growth and investment opportunities in the high-voltage electricity transmission sectors of eight ASEAN countries. It will include key trends, developments, latest data, and statistics (from 2015 to 2024), and offer growth projections up to 2034.

Does ASEAN have a power system capacity expansion model?

Here, we present an integrated power system capacity expansion model for ASEAN over 2018 - 2050. The results provide hypothetical pathways to decarbonize the ASEAN power sector while meeting the projected electricity demand by strategically pursuing renewable energy, carbon capture and sequestration, and cross-border transmission grids.

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcome the barriers in renewable energy legislation, energy governance, and business environment. Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.
