What is a 4/5 MWh battery energy storage system?

CPS is excited to launch the new 4/5 MWh Battery Energy Storage System for the North American market. The battery system is a containerized solution that integrates 10 racks of LFP batteries for the 4 MWh model and 12 racks of LFP batteries for the 5 MWh model, and offers a high energy density for utility applications.

Are battery storage projects eligible for energy storage incentives?

The Program Manual [PDF] provides a full list of project eligibility and requirements. For battery storage systems above five MW of AC power, projects could be eligible for incentives through the Bulk Energy Storage Program. Additional details on both the Residential and Retail Energy Storage Incentive are available in the program manual [PDF].

How do I apply for a retail energy storage incentive?

Contractors and Builders can apply for this program separately through the NYSEERDA Portal. The Retail Energy Storage Incentives are available for new commercial scale distributed (retail) energy storage projects up to 5 megawatts (MW) that are either located behind a customer's electric meter or interconnected directly to the distribution network.

Where can I find information about energy storage incentives?

Incentive details will be available on the Residential Energy Storage Incentive Dashboard and Retail Energy Storage Incentive Dashboard. The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are available for up to 25 kWh of storage capacity.

Designed for efficiency and ease of use, this energy storage container system offers minimalist operation and maintenance, making it an attractive choice for industries that prioritize cost ...
