Are 10kW solar systems a good investment in Australia?

10kW solar systems are a great investment for Australian homes with high levels of electricity consumption or businesses with relatively small electricity needs. This article takes a look at 10kW solar system pricing, energy production and returns in Australia. How many panels & how much roof space for a 10kW solar system?

What is a 10kW Solar System?

10kW solar systems are on the large side for residential installations (where 5kW to 6.6kW is much more common). So as mentioned above, 10kW systems tend to be most appropriate for homes or businesses with significant amounts of daytime electricity consumption above 40kWh per day.

Is a 10kW Solar System a safe choice?

If your average daily consumption falls between 32 to 40kWh (see below 10KW SYSTEM OUTPUT IN MAJOR CITIES Table); the 10kW system would be a safe choice. As in the 10kW Solar system would on average generate a similar amount of energy respective to what you are using daily and also allow you to comfortably increase your daily consumption if needed.

How much does a 10kW Solar System cost?

Alright, the million-dollar question -- or more like the six-thousand-dollar one. As of mid-2025, you'll find that 10KW solar system prices usually start from around A\$5,999 for basic panel + inverter packages. If you go for better quality gear (like Fronius inverter or REC/SunPower panels), you're easily looking at A\$7,000-\$9,000+.
