What's new at Canadian Solar?

"We are proud to introduce our new environmentally friendly, low-carbon modules, marking a key milestone in sustainable solar manufacturing," said Thomas Koerner, Corporate Senior Vice President of Canadian Solar.

How did Canadian Solar develop the low carbon modules?

Canadian Solar developed the Low Carbon modules through proprietary innovations in ingot, wafer and HJT cell technologies. Each technology innovation has contributed to the reduction of energy consumption and carbon emissions:

Who is Canadian Solar?

Since entering the project development business in 2010, Canadian Solar has developed, built, and connected approximately 12 GWp of solar power projects and 6 GWh of battery energy storage projects globally.

When is Canadian Solar re+ 2025?

Canadian Solar's low-carbon modules will be showcased at RE+2025 in Las Vegas, Nevada, from September 9 to 11, 2025. Visit Canadian Solar's booth V10031 to learn more. About Canadian Solar Inc. Canadian Solar is one of the world's largest solar technology and renewable energy companies.

The PV power systems market is defined as the market of all nationally installed (terrestrial) PV applications with a PV capacity of 40 W or more. A PV system consists of ...

The LC modules are fully compatible with Canadian Solar's inverter portfolio, including its 350-kW utility inverter range with a 40 A MPPT DC input current. This ensures ...

KITCHENER, ON, Sept. 8, 2025 /PRNewswire/ -- Canadian Solar Inc. (the "Company" or
