Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

How much does a 20kW Solar System cost in Australia?

The price of a 20kW solar system depends on the choice of solar panels, inverters, balance of system used, and your property infrastructure, complexity of install and whether you opt for battery storage. On average, in Australia, the cost of a 20kW solar system whether for residential or commercial can be anywhere from \$15,000 to \$19,000.

Which solar system should you choose in Canberra?

The 6.6kW solar system is our most popular option for Canberra homeowners. It's affordable, efficient, and compatible with battery storage. If you're concerned about solar system price in Canberra, the 6.6kW system delivers a great return on investment. Need more power for your growing family or home-based business?

Why should you choose a solar panel system in Canberra?

With over 300 sunny days a year, a well-sized solar panel system in Canberra can significantly reduce your energy bills. Whether you're located in the heart of the city or on the outskirts, Ads Solar can customise the perfect system for your property -- residential or commercial. Here is why Ads Solar is your best choice:
