Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Are Chinese solar panels a threat to national security?

An organization is calling for an investigation into the national security risks posed by Chinese-made solar products. Power inverters can be found in solar panels and wind turbines that are connected to the electricity grid as well as batteries, heat pumps, and electric vehicle chargers.

Can a communication device talk back to China?

It wasn't listed in any documentation. But here it was: a communication device, capable of talking to the outside world. Capable, potentially, of talking back to China. This discovery--and others like it--has set off alarms across U.S. energy and security circles.

Does China have a grip on energy infrastructure?

NATO added that China's grip on energy infrastructure is deepening. "We must identify strategic dependencies and take steps to reduce them," a NATO official said. With critical infrastructure at stake, governments are being pushed to act before the risk escalates further.
