What is an IP54 cabinet?

Prism's IP cabinet range provides ingress protection to an IP54 rating and can be deployed in areas with high dust and moisture content. All Prism IP54 enclosures are sealed or welded in construction and fitted internally with compression gaskets, providing secure apertures and...

What is a Vanguard® outdoor weatherproof IP rated (IP54 to IP65) enclosure?

Our Vanguard® outdoor weatherproof IP Rated (IP54 to IP65) enclosures offer a modular product range in multi bay, multi height and multi depth options, with the flexibility to house a broad range of equipment in a variety of industry standard mounting formats.

Why do you need an IP54 server cabinet?

Since electronic equipment is extremely susceptible to damage from external influences such as heat, cold or dust, and dirt deposits, costly new purchases can become necessary more frequently. In an IP54 server cabinet, all IT equipment can be stored neatly and compactly and protected from these very possible damages.

What is the maximum protection level for an IP54 server cabinet?

With a maximum protection level of 9, the product even offers protection against water from high-pressure and steam jets as well as permanent submersion. For an IP54 server cabinet, a degree of protection of 4 provides good protection against splashing water.

These cabinets are constructed using high-quality materials and fortified with secure locking mechanisms, tamper-evident seals, and intrusion detection systems to deter unauthorized entry.

Designed to house a variety of communications equipment, CUBE customers take advantage of our engineering and factory integration for complete turn-key solutions.
