What is a rated IP54 enclosure?

Enclosures rated with IP54 are protected against limited dust ingress, and from water spray from any direction. Limited dust ingress means that most dust cannot enter the enclosure, but a small quantity of it can. However, the dust that does get through is not nearly enough to disrupt the work of the electrical components of the enclosure.

Why should you choose an IP54 enclosure?

Offer different sizes and shapes with many mounting ways. Typically, IP54 enclosures offer protection for electronic or mechanical components. They also protect against voltage and moving parts, as well as against splashing water from any direction, thus ensuring the safety of people in contact with the enclosure.

Is IP54 suitable for outdoor applications?

IP54, just like our other IP enclosures, is suitable for outdoor applications because it is protected against low-pressure water sprays from any direction. However, keep in mind that these enclosures are not entirely dust-tight and waterproof, so very dusty or underwater environments may be too harsh for them.

What is KDM IP54 enclosure?

KDM IP54 enclosure has a high level of protection against particles such as dirt, dust, oil, and other non-corrosive material. Also protects from voltage and moving parts for people who come in contact with the enclosure. Not just that, IP54 adds protection from splashing of water against the machine from any direction.
