How does the IP55 outdoor server rack work?
The cabinet design allows natural wind coolingthrough filtered vents on the front door and venting under the lip of rain hood. The IP55 outdoor server rack also has two or four fans with a dust-proof cover located at the top of the cabinet for greater airflow/cooling.

How many fans does the IP55 outdoor server rack have?
The IP55 outdoor server rack also has two or four fanswith a dust-proof cover located at the top of the cabinet for greater airflow/cooling. The fans are serviceable and the front door dust filters are easily accessible for cleaning. All fixtures are internal to the cabinet to provide a secure solution.

What is an outdoor floor standing server cabinet enclosure?
AZE's outdoor floor standing server cabinet enclosures are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. They have a rain hood and water and dust proof polyurethane door joint strip features,all fixtures are internal to the cabinet to provide a secure solution.

Why do you need an outdoor electrical server cabinet enclosure?
Generally,you need an outdoor electrical server cabinet enclosure to protect the electrical components from the environment.The enclosures,as the name suggests,encloses electrical or electronic equipment thus preventing users from electrical risks like shock,etc.That is the general perspective on why you need a free-standing server enclosure.
