What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

Why should battery storage be a political priority in Europe?

Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness. The mission of the Battery Storage Europe Platform is to make battery storage and flexibility a political priority by: Placing battery storage at the top of the EU agenda for energy security and competitiveness.

How can we improve battery storage in Europe?

Strengthening the business case and regulatory frameworks for battery storage across Europe by accelerating the implementation of existing electricity market and renewable energy legislation, and complementing it with a dedicated EU Flexibility Package and Storage Action Plan.

Should battery storage be optional in Europe?

The move builds on the success of SolarPower Europe's annual European Market Outlook for Battery Storage, an established point of reference in the energy sector. Juhi Dion Sud, newly appointed Head of the Battery Storage Europe Platform, said: "Battery storage is no longer optional- it is essential."

SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery ...
