Which European countries have the most solar energy?

The age of solar energy is dawning in Eastern Europe: According to the European industry association SolarPower Europe, Poland has been one of the top ten leading countries in Europe in terms of PV deployment since 2016. Hungary has joined the list after adding 1.6 gigawatts (GW) of PV capacity in 2023, a 45 percent increase over the previous year.

Who are Europe's leading solar companies?

1. Enel Green Power (Italy) The Italian energy giant continues to dominate Europe's solar landscape with massive projects across Spain, Italy, and Greece. Their EUR 5.2 billion investment in bifacial panel technology with integrated tracking systems positions them at the industry forefront.

Why is Eastern Europe getting more solar power?

The country's total solar power output increased dramatically, by 970 megawatts (MW) to be exact. The PV boom in Eastern Europe is driven by a desire for greater energy independence and a commitment to environmental and climate targets. Other key drivers are cost efficiency, technological advances and subsidy policies.

How big is Europe's solar market?

The European solar market is experiencing unprecedented growth, with installations projected to reach 87 GW annually by 2025. Driven by the REPowerEU plan and ambitious carbon neutrality targets, the continent is accelerating its transition to renewable energy.

Discover the 2025 global top 10 solar rooftop mounting brands, including ARCTECH, Nextracker, and Grace Solar. Explore trends, technologies, and market leaders in lightweight, AI-driven ...

New data shows that Eastern Europe has become a global leader in solar energy and is far outpacing the rest of
