Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a 4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Could a grid-side energy storage power station solve urban electricity problems?

"The grid-side energy storage power station is a 'smart regulator' for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a Google translation. This would "effectively solve the pressure of urban power supply and ensure the safe, stable and efficient electricity demand of the city," it added.

Where will Tesla's first grid-scale battery storage station be located?

BEIJING (Reuters) - Tesla's first China grid-scale battery storage station using its megapack batteries will be located in Shanghai, local media Yicai reported on Friday.

The deal involving an investment of 4 billion yuan (\$556.8 million) was signed between the U.S. automaker, China Kangfu International Leasing Co and the Shanghai local ...
