Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.

What is the battery energy storage system (BESS) industry?

The Battery Energy Storage System (BESS) industry has experienced remarkable growth in recent years, driven by the global shift toward renewable energy and the increasing need for reliable grid stability solutions.

How will a new battery energy storage system help the Finnish grid?

After the start of commercial operations in 2026, the project will contribute an important balancing function to the Finnish grid, supporting the Finnish renewable energy expansion. The groundbreaking ceremony took place in the afternoon on Monday the 26th of May on the site near Nivala where the battery energy storage system will be built.

What is a battery energy storage system (BESS) all-in-one cabinet?

Building a BESS (Battery Energy Storage System) All-in-One Cabinet involves a multi-step process that requires technical expertise in electrical systems, battery management, thermal management, and safety protocols.

Manufacturing a Battery Energy Storage System (BESS) cabinet is a complex process that involves designing, engineering, and assembling a robust and reliable system to ...

At Korkia, we are not just following the trend, but actively shaping it. With a 20 GW portfolio of renewable energy projects and extensive expertise in battery storage development, ...
