What are the energy supply and demand sectors in Ghana?

The Energy Supply Sector of Ghana is thus: Biomass, Petroleum and Power (Electricity), whilst the Energy Demand sectors of the economy are the Residential, Commercial & Services, Agricultural & Fisheries, Transport and Industries(Figure A).

What type of energy does Ghana use?

Ghana's thermal power generation is fueled largely by natural gas, but occasionally uses light crude oil and diesel. Ghana exports power to Togo, Benin, and Burkina Faso. The Government of Ghana remains heavily involved in the energy sector, with state entities having a controlling presence in the value chain.

Why is Ghana's energy sector in debt?

Ghana's energy sector has significant debt because of years of accumulated financial shortfalls from power pricing that does not recover full cost, although residential and business electricity consumers consider tariffs to be high.

Who is responsible for electricity distribution in Ghana?

State-owned Ghana Grid Company(GRIDCO) is still solely responsible for transmission throughout the entire country. The final leg, distribution, is mainly controlled by the state-owned entities Electricity Company of Ghana (ECG) and Northern Electricity Distribution Company (NEDCO).
