The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

There are many issues to consider when developing and financing energy storage projects, whether on a standalone or integrated basis. We have highlighted some of key regulatory ...

In 2023, battery storage continued to be the fastest growing energy storage technology, with increased investment and policy attention. By the end of 2023, 43 jurisdictions had in place ...

2025 was a pivotal year for energy storage: Global grid-scale BESS deployments surged by 23%, adding a staggering 92 GW / 247 GWh worldwide, driven by falling costs of ...

The construction of large-scale energy storage facilities will ensure the efficient and stable integration of renewable energy generation into the national grid, accelerating Saudi ...

As renewable energy adoption skyrockets, the world's top 10 large energy storage sites are becoming the backbone of our decarbonized future. From Saudi Arabia's desert ...

Why develop battery-based energy storage? The storage of electrical energy in batteries is an essential complement to renewable energies, which are intermittent by nature. ...

US developers of large-scale battery storage stations have 18.7 GW of new capacity under construction, according to S& P Global Energy Market Intelligence data, ...

Battery storage can help reduce energy costs, enhance the use of renewable energy sources and reduce reliance

on fossil fuels. BYD Energy Storage and Saudi Electricity ...

According to official information, as of May this year, the proportion of new energy installed capacity in Xinjiang, Inner Mongolia, and Qinghai exceeded half of total local ...

Eolian LP, a portfolio company of Global Infrastructure Partners, has completed construction on what will become the largest merchant energy storage facility in the world, the ...

Discover the world's biggest battery storage projects of 2025, including BYD's 12.5 GWh system in Saudi Arabia, Grenergy's 11 GWh Atacama project, and more shaping the global energy ...

China again dominated global battery storage deployments in August, accounting for two-thirds of what came online, but Europe, North America and Australia had good months ...
