Melbourne makes up approximately 6.1% of all Power stations in Victoria. Preview of Power station businesses in Victoria, Australia

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

Victoria, Australia, has seen just under 5 GWh of battery energy storage systems (BESS) granted approval for development by the state and federal governments.

The Rangebank storage system will help support grid stability and is expected to have the storage capacity to
