---

The American Clean Power Association reported that the United States added a record 1,602-MW of battery storage capacity in the first quarter of 2025, equivalent to the ...

Residential battery storage saw its strongest year ever, installing over 1,250 MW in 2024, a 57% increase from the previous year. The last quarter alone saw a record-breaking ...

Across the United States, battery energy storage is rapidly emerging from a niche technology into mainstream grid infrastructure. The growing attractiveness of battery energy ...

The federal Energy Information Administration estimates that the U.S. now has close to 30 GW of utility-scale battery capacity alone, not counting other commercial, industrial ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved...

The US Energy Information Administration expects 18.2 GW of utility-scale battery storage resources to come online this year, or 29% of anticipated capacity additions, second ...

A battery energy storage system (BESS) is an electrochemical device that charges (or collects energy) from the grid or a power plant and then discharges that energy at a later time to ...

As of April, there are 19 states with 100 MW or more of utility-scale battery storage. California is by far the top battery storage user, with around 13,000 MW in place, or about 42% ...

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity--enough to power 20 million homes--to ...

The Battery Energy Calculator serves as a precise tool for determining the energy stored within a battery, allowing you to make informed decisions regarding energy ...
