What is a cabinet style generator system?

This cabinet style generator system looks great at home, is easy to setup and allows for backup power during an outage. This system is also safe for indoor use; it can be installed in a closet, in a cabinet, or made portable by using a wheeled cart. By building your own battery backup system you can size it to your desired needs.

How do I connect a generator to my home?

Connect the power cord: Attach the power cord from the inlet box to the generator. Start the generator: Follow the manufacturer's instructions. Activate power: Use the transfer switch to direct power to selected circuits in your home. If you're using a mechanical interlock instead, be careful to monitor the load closely.

Can I build my own generator enclosure?

This site contains affiliate links for which I may be compensated. Yes, you can build your own generator enclosure--and you don't need to be a master carpenter to do it. The key is balancing protection from the elements with enough airflow to prevent overheating or carbon monoxide buildup.

How do I set up a generator?

Here's what to do: Set up the generator: Move it to its designated outdoor spot. Connect the power cord: Attach the power cord from the inlet box to the generator. Start the generator: Follow the manufacturer's instructions. Activate power: Use the transfer switch to direct power to selected circuits in your home.
