-----  
Is Norsk Hydro planning a new pumped storage power plant?

In April 2020, the Norwegian Ministry of Energy granted Norsk Hydro a concession to develop the Illvatn pumped storage power plant. An application for a plan change is being processed by the Norwegian Water Resources and Energy Directorate (NVE).

Can a plan change be implemented in Norway?

An application for a plan change is currently being processed by the Norwegian Water Resources and Energy Directorate (NVE). The project's implementation depends on a positive response to the application, with the final investment decision expected by the second quarter of 2025.

What projects are under development in Norway?

Another project under development in Norway is a new power plant at Torolmen, in the  $\&\#197;$ rdal municipality, with an estimated annual production of around 30 GWh. The total investment for this project could reach NOK290 million (US\$27.4 million), with potential construction starting as early as 2027.

What if new interconnectors are built between Norway and other European countries?

If new interconnectors are built between Norway and other European countries, Norwegian hydropower sites can store energy during periods in which variable renewable generation exceeds the total demand, and produce energy during periods during which continental European production fall short of demand.

Operations will start in the summer of 2025, with the first delivery of CO<sub>2</sub> by ship from the Heidelberg Materials cement plant in Brevik, Norway. The CO<sub>2</sub> will be injected into ...

This Implementation Plan (the "Plan") sets forth the program goals and implementation strategies for the Energy Storage Market Acceleration Bridge Incentive Program authorized by the New ...

The Oslo Grid Energy Storage Project is rewriting the rules of renewable energy management - and doing it with Scandinavian flair. Let's unpack why this initiative matters to ...

It aims to grasp the strategic window period of the development of new energy storage in the 14th five year plan, accelerate the large-scale, industrialized and market-oriented development of ...

Looking forward to 2024, China's energy storage industry will continue to develop rapidly under the continuous promotion of the '14th Five-Year Plan'; energy storage ...

The project started in January 2022 and has a project period of 4 years, until December 2025. The project is coordinated by the Norwegian University of Science and Technology and ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main goals of ...

The Climate Investment Fund, established in 2022, is Norway's most important tool in accelerating the global energy transition by investing in renewable energy, storage and ...

Hydro plans to build a new pumped storage power plant in Luster Municipality, Norway. With construction starting in 2025 and operations beginning in 2028/2029, the total ...

The goal of the HydroBalance project is to assess the feasibility of using Norwegian hydropower storage capacities for supporting a better, more efficient and affordable integration of ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

In terms of application, equipping energy storage in renewable electricity generation projects is the main application field for new type energy storage, with a cumulative installed capacity ...

The Illvatn project, with an estimated price tag of NOK1.2 billion (US\$113 million), is expected to begin construction in 2025, targeting 2028 or 2029 for full operation.
