Computerized Solutions The advent of the industrially-hardened computer chip brought intelligence, configurability and reduced wiring to substation visualization. Hard-wired alarm ...

Schneider Electric Global. Innovative prefabricated data center architecture provides critical IT infrastructure for high-density computing clusters New rack PDUs and rack ...

Need to have someone contact you regarding Server Technology Rack PDUs? We have a team of power experts available to support you, regardless of your project's stage, size, or scale.

In contrast, intelligent substations" software-based protections eliminate banks of outdated relays while enabling operators to remotely monitor and control operations in real-time. Intelligent ...

With the development of science and technology in the 21st century, most areas of people's lives have been gradually covered by intelligence, and the substation's intelligence ...

Designed to meet the needs of data center managers the InfraRack Intelligent Server Rack Series combines the features and functionality of Austin Hughes popular server rack with enhanced ...

Intelligent server racks, with their AI-driven capabilities, redefine energy optimization. Through real-time monitoring of server workloads and power consumption, these racks can dynamically ...

No matter your rack power requirements, whether average or extra high densities, Server Technology provides high-density rack PDUs designed to support compute-heavy applications.

With a focus on greener power, improved efficiency and the adoption of smart-grid technologies, utility

Intelligent Technology Support for Server Racks in Substations

companies are upgrading from conventional substations to digital substations.

National Grid is not the first utility to adopt IEC 61850 standards to modernize its substations. However, it is the first to digitize its transmission substations fully as part of a strategy to ...

Introducing intelligent server racks from Air-conditioned server racks, in particular, is transforming the world of data centre infrastructure. With cutting-edge cooling technology, smart ...

GB200 NVL72 at 120kW/rack now shipping--the 2.4MW figure was aspirational for future configurations. Vera Rubin NVL144 targeting 600kW per rack by 2026. Liquid cooling (direct-to ...

Smart Substation Control and Protection SSC600 centralizes all protection and control functionality into one single device on distribution substation level for minimal engineering, ...

Discover how leading utilities and developers are investing in intelligent substations to future-proof their operations: Download our white paper for insights on best practices, technical ...

The solution accurately responds to the development requirements of intelligent management of modern power equipment and provides strong technical support for intelligent substation ...

At Red Helix, we partner with Server Technology (a brand of Legrand) to deliver advanced, intelligent power distribution units (PDUs) for data centres and mission-critical IT infrastructure.
