Is the Yangtze River economic belt a strategic development zone?

The Chinese government has designated the Yangtze River Economic Belt as a national strategic development zone and proposed a series of policies to promote regional economic transformation and green development.

Does industrial green technology innovation in the Yangtze River economic belt have a spatial dependence? Based on the previous test results, it can be determined that the efficiency of industrial green technology innovation within the Yangtze River Economic Belt has a specific spatial dependence, and there is a significant spatial positive correlation.

Why should China promote carbon balance in the Yangtze River economic belt?

Provides key insights for sustainable development and carbon neutrality goals in the Yangtze River Economic Belt. Promoting carbon balance in the Yangtze River Economic Belt is a crucial step in China's pursuit of carbon neutrality, with industrial structural transformation serving as a vital pathway toward this goal.

Why is the Yangtze River economic belt important?

The Yangtze River Economic Belt is the most developed region in the Yangtze River Basin, and it is also the economic belt with the highest economic density except for coastal areas. It is essential to promote coordinated development between the East and the West and advance the opening of coastal areas, rivers, and borders (Zhang et al., 2021a, b).

Explores the spatiotemporal evolution of trade-offs and synergies between urbanization and carbon balance in the Yangtze River Economic Belt. Reveals regional ...

Semantic Scholar extracted view of "The impact of industrial structural transformation in the Yangtze River economic belt on the trade-offs and synergies between ...

Finally, this study proposes strategies to optimize green technological innovation efficiency, aiming to provide a reference for the Yangtze River Economic Belt and other ...

As an important economic growth pole and ecological area in China, the urban agglomeration of the Yangtze River Economic Belt (YREB) is the key to carbon emission ...

The Yangtze River Economic Belt (YEB), designated as a "pioneering and demonstration belt" for China's Ecological Civilization, has experienced policy shifts in ...

Improving industrial eco-efficiency (IEE) is significant for green development, particularly in the areas characterized by intense industrial agglomerations, such as the ...

Based on the Haken Model, this paper summarizes the coevolution law of logistics industry and manufacturing industry in the Yangtze River economic belt through two-stage empirical ...

In the context of accelerating global warming, which profoundly affects ecosystems and human societies, it is crucial to understand the complex mechanisms through which ...

BEIJING -- Six years after China made the development of the Yangtze River Economic Belt a national strategy, the country has taken great strides in balancing economic ...

The Yangtze River middle reaches city cluster has excellent transport infrastructure, strong economic power and further urbanization potential, which are the key ...

The Yangtze River Economic Belt (YREB) plays a crucial role in addressing China's dual challenges of rapid urbanization and environmental sustainability, while also ...

Using the entropy weight method, we measure manufacturing ICSC resilience across provinces and cities in the Yangtze River Economic Belt from 2017 to 2022 and further ...

Based on the panel data of prefecture-level cities from 2005-2019, this paper used the difference-in-differences method to study the effects and mechanism of the implementation of the ...

Four main conclusions can be drawn: 1) The comprehensive development of the industrial economy and industrial ecology in 11 provinces and cities in the YREB is generally ...
