How much does a battery energy storage system cost?

When evaluating battery energy storage system (BESS) prices per MWh, think of it like buying a high-performance electric vehicle - the battery pack is just the starting point. Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary components.

How do I unlock the value of Bess?

Unlock the value of BESS with market-based price intelligence & advanced analytics. Complete the form to download the BESS Market Data & Insights brochure. Are You Exploring BESS? Negative pricing and low capture rates are eroding revenues, making energy storage key to optimizing returns.

Why should you use Bess?

With benchmark BESS tolling prices, co-located PPA prices for hybrid projects and analytics to model expected revenues for standalone assets, you can confidently price, structure and negotiate deals. Our data enables you to make investment decisions backed by insights into what is actually transactable in the market.

What is a Bess deal tracker?

BESS Deal Tracker showing who's closing different types of BESS offtake deals, at what scale and tenor across Europe. Reported BESS Tolling Price Range showing the range of BESS tolling prices offered, based on verified market data
