How much electricity does Hollandse KUST Noord generate?

With an installed capacity of 760 MW, the consortium plans to have the Hollandse Kust Noord project operational by the end of 2023. Comprising 69 Siemens Gamesa 11 MW turbines, it will generate at least 3.3 TWh per year, or enough to meet 2.8 per cent of current electricity demand in the Netherlands.

How many kV cables does a Dutch offshore wind farm use?

Dutch offshore wind farms will be connected through 66 kV cables, and this is expected to be a rapidly growing market elsewhere over the coming years. Export cables from substation to shore have a significantly higher capacity than array cables, ranging from 132 kV to 245 kV.
