What is Australia's PV market like in 2023?

This comprehensive report provides a detailed analysis of Australia's PV market, highlighting key trends and developments throughout 2023. In 2023, Australia's PV market remained stable, with 4.2 GW of new solar capacity registered. Rooftop solar continued to dominate the market, with strong growth in commercial and industrial installations.

Is solar a viable alternative for mining & heavy industry in Australia?

Today, solar for mining and heavy industry in Australia offers a compelling alternative, reducing costs, emissions, and reliance on fossil fuels. Mining and heavy industrial sectors are among Australia's largest energy consumers, operating 24/7 in remote areas.

How many solar PV installations are there in Australia?

As of 30 September 2025, there are over 4.22 million PV installations in Australia, with a combined capacity of over 43.0 gigawatts. The following graphs show the rated capacity of solar PV installed in each month. The rate of installations has been influenced by changes in the policy mechanisms that have supported this technology.

Is Australia a good place to invest in solar energy?

Australia's vast, sun-drenched landscape makes it an ideal location for large-scale solar energy projects. With solar photovoltaic (PV) systems becoming increasingly cost-effective, many mining companies are integrating them into their operations.

a, Spatial distribution of global mining patches and PV installations, and their quantities across continents. (i)-(iii) Detailed magnified maps of the USA (i), Europe (ii) and ...

Australia's vast, sun-drenched landscape makes it an ideal location for large-scale solar energy projects. With

solar photovoltaic (PV) systems becoming increasingly cost ...

This work quantifies and characterises the current level of renewable energy adoption by Australian mining houses and the evolution of renewable energy technology ...

Australia is generating more solar electricity per person than any other country: about 2 Megawatt-hours per person per year. It is interesting to examine the impact of widespread ...

The purpose of this scenario was to assess the cost of an energy system supported by large-scale grid battery storage, which typically needs a reduced level of solar and wind ...

This graph shows the combined large-scale generation certificates (LGC) spot and National Electricity Market (NEM) wholesale price for large-scale wind and solar PV generation.

This report contains estimates and general information only. It summarises technical judgments of the authors based on technical analysis of public domain documents and expert interviews. ...

This comprehensive report provides a detailed analysis of Australia's PV market, highlighting key trends and developments throughout 2023. In 2023, Australia's PV market remained stable, ...

In recent years, the advantages of distributed solar PV (DSPV) systems over large-scale PV plants (LSPV) has attracted attention, including the unconstrained location and ...
