What are the benchmarks for PV & energy storage systems?

The benchmarks in this report are bottom-up cost estimates of all major inputs to PV and energy storage system installations. Bottom-up costs are based on national averages and do not necessarily represent typical costs in all local markets.

What is a PV energy estimate?

Estimates the energy production and cost of energy of grid-connected photovoltaic(PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to easily develop estimates of the performance of potential PV installations
