How do I secure land use rights for a Bess development?

Securing land use rights for a BESS development is similar to the process for solar and wind farm developments. During the investigations and preliminary activity phase, a developer will need access. This is typically provided in an exclusivity agreement, option deed or a licence agreement.

What is a Bess Land Use?

Currently, a BESS land use will include, among other things: (1) a perimeter fenced area; (2) various buildings that appear similar in design to storage containers; (3) within the storage container buildings, "cabinets" containing batteries and fire suppression system; and (4) ventilation/air conditioning systems to cool the individual buildings.

Should a township consider a solar farm or a Bess project?

Setbacks: The smaller land areas necessary for a BESS project than a solar farm may provide more practical leeway with respect to setbacks being further from roadways and residential properties. A township should carefully consider setback requirements to avoid impacts to ensure compatibility with neighboring land uses.

What is a Bess zoning system?

To Townships, BESSs are a land use that it may seek to regulate through its zoning power to ensure that safety and security needs are met. To ensure a reliable utility grid, electricity supply must meet electricity demand. Energy generation must be high enough to meet peak demand.

Main products are aluminum products, outdoor telecom cabinets, outdoor equipment cabinets, outdoor battery cabinets, outdoor temperature control cabinets, etc. We have served ...

This Battery Energy Storage Systems (BESS) Model Ordinance and Guide is intended to assist local planning authorities (LPAs) with the development of their own ordinances and regulations ...
