-----  
What percentage of Qatar's energy production is renewable?

File photo of Al Kharsaah solar project. Doha, Qatar: The current production of renewable energy in Qatar is estimated at 5 percent of the total energy mix, and is forecast to rise to 18 percent by 2030.

What are the key sectors to add to the Qatar energy mix?

The key sector to add to the Qatar energy mix is solar energy. The list below provides the key sub-sectors in this industry:

What is Qatar's energy strategy?

With the participation of all stakeholders in Qatar's energy sector, we aspire to achieve the best results for which the Strategy has been developed and seek to encourage stakeholders and concerned entities to launch initiatives, scientific research on renewable energy, and call for cooperation among all to build a sustainable future. (QNA)

Why is Qatar a good place to buy electricity?

Qatar has the world's third-largest gas reserves, which has allowed for cheap and plentiful electricity, as well as huge financial resources. At the moment, thermal electricity generating stations account for more than 90% of Qatar's total capacity.

GE Power is the O& M contractor for thermal power project for a period of 30 years. For more details on Qatalum Combined Cycle Power Plant, buy the profile here.

In its first investment in Uzbekistan, Nebras Power partnered with an international consortium of power companies, including French company EDF (Electricit&#233; de France) and ...

At the moment, thermal electricity generating stations account for more than 90% of Qatar's total capacity.
