What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Florești, Cluj county, which is expected to be operational by the end of 2025.

Why should investors invest in energy storage in Romania?

This step improves regulatory transparency, another key factor investors consider when committing capital. Romania's ambitions for energy storage are growing rapidly. The country plans to install 5 GW of battery energy storage capacity by 2026, a massive leap from its current level, which reached around 400 MWh as of April 2025.

Is Romania paving the way for more commercially viable energy storage business models?

By removing these financial disincentives, Romania is paving the way for more commercially viable energy storage business models--especially in the C&I energy storage segment, where project economics are highly sensitive to operational costs.

Does Romania have a double taxation of stored electricity?

Romania's National Energy Regulatory Authority (ANRE) recently eliminated the double taxation of stored electricity. The new rules exempt electricity stored and then reinjected into the grid from several tariffs, removing a significant financial barrier for investors.
