-----  
How does the Federal Government procure a solar system?

The federal government procures construction services and materials for solar systems through multiple agencies. All procurement notices for federal contracts over \$25,000 are posted on the System for Award Management (SAM) website. For example, a 5-MW solar system at Fort Campbell in Kentucky was installed in 2017 and accounts for 10% of the base's energy needs.

What are the different types of price in federal solar contracts?

Federal solar contracts can have different types of price, including fixed-price contracts, cost-reimbursement contracts and incentive-type contracts.

Can a solar contractor work with the government?

Solar contractors can pursue federal government work through subcontracting opportunities. Most government construction contracts, including subcontracts, reflect policies contained in statutes and in the Federal Acquisition Regulation (FAR).

How does GSA work with solar contractors?

GSA works with solar contractors by requiring companies to have been in business for at least two years and have a balance sheet of sales greater than \$75,000 each of the last two years. Additionally, solar contractors can pursue federal government work through subcontracting opportunities.
