-----

Polish coal trader Weglokoks will receive PLN 50 million (USD 12.9m/EUR 11.9m) in funding from the Recovery and Resilience Facility (KPO) to develop a 35 MW photovoltaic ...

Charlotte, North Carolina is the first municipality to execute a renewable power agreement under utility Duke Energy's Green Source Advantage (GSA) program, further ...

Utility-scale solar delivers affordable, reliable clean energy to entire communities, reduces carbon emissions, replaces fossil fuels, and supports local jobs -- all while powering homes and ...

A 35-MW solar project is coming to Charlotte, North Carolina, as part of the Duke Energy Green Source Advantage (GSA) Program. The project will be built by Carolina Solar ...

With a compact configuration and faster install time, Solaris 35 MW Turbine Power Solution provides increased modularity and fewer interconnects for when speed of power is critical.

With a compact configuration and faster install time, Solaris 35 MW Turbine Power Solution provides increased modularity and fewer interconnects for when speed of power is critical. Its ...

As we just discussed, one megawatt is equal to one million watts or 1,000 kilowatts. Since all solar panel system sizes are described in kilowatts, here is a quick table to ...

Nofar USA, a subsidiary of global independent power producer Nofar Energy, is the successful bidder for the acquisition of a 979-MW utility-scale solar portfolio developed by ...

This 35 mw solar facilities will be in the Iredell county construction. According to a 20-year power purchase agreement, duke energy company will receive a zero carbon power, ...

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress ...

Pacific Energy powers a green future with a 35-MW solar park at Gold Fields' St Ives mine, driving renewable energy innovation and reducing emissions in Western Australia.

The 1.75 MW solar project is expected to generate 3,800 MWh of renewable energy annually and reduce grid energy costs by an estimated \$1.7 million over the 20-year term of ...

In other words, increasing the power (MW/acre) and energy (MWh/acre) density of utility-scale PV can at least partially offset the higher land costs likely to be incurred going forward, while also ...

Consumers Energy has switched on a 250 MW solar project in western Michigan built on an active municipal wastewater treatment site, using a dedicated 138 kV grid connection.
