-----  
What is the average profit margin for a solar business?

The average profit margin for a solar business is about 10%. In your first year or two, working part-time you could do two installations per month for \$17,000 per installation and make about \$400,000 in annual revenue, which would give you about \$40,000 in profit.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate--improving profitability and supporting sustainability goals.

How important are ancillary services to energy storage?

Ancillary services that stabilize the power grid typically represent 50 to 80 percent of the full storage revenue stack of energy storage assets deployed today. This is observed across multiple mature storage markets but is expected to decrease to less than 40 percent by 2030.

Enter energy storage systems--the unsung heroes that keep the party going after sunset. The global solar energy storage market, valued at \$33 billion and generating 100 ...
