What is a socomec battery energy storage system?

At Socomec, we offer a comprehensive range of Battery Energy Storage Systems designed to meet diverse energy needs. Socomec systems are composed of advanced power conversion technologies and LFP batteries driven by intelligent Battery and Power Management Systems and software.

What is a modular energy storage system?

The modular energy storage system (ESS) can decouple energy production from consumption to better meet consumption needs. By using energy storage to harness the potential of renewable energy to charge batteries, it becomes more efficient in terms of UPS battery monitoring and maintenance to integrate these intermittent sources into the power grid.

How do energy storage systems work?

Energy storage systems capture and hold energy for later use by shifting when and how electricity supply and demand are balanced. They're charged using electricity from the power grid during periods of low demand or extra capacity.

Where are ESS Solutions manufactured?

ESS solutions are manufactured in Wilsonville, Oregon leveraging a largely domestic supply chain. ESS core technologies have a design life of 25 years and have been extensively tested with the U.S. Department of Energy. Advanced cycle testing simulating over 4 decades of use demonstrated no degradation in performance.

The inverter is composed of semiconductor power devices and control circuits. At present, with the development of microelectronics technology and global energy storage, the emergence of ...

Energy Storage Is Powering New York's Clean Energy TransitionEnergy Storage SafetyAn Expanded Goal of 6 Gigawatts by 2030In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030.
