Can solar panels be installed on new homes in Japan?

Solar panels on the roofs of homes in Hachioji, western Tokyo (Asahi Shimbun file photo) Japan's first local regulation requiring solar panel installations on new single-family homes took effect on April 1 in Tokyo and Kawasaki in Kanagawa Prefecture.

Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

Is Tokyo's mandatory solar panel installation a step in the right direction?

"Tokyo's mandatory solar panel installation for new buildings is a step in the right direction for promoting green energy," said Masayuki Mae, an associate professor at the University of Tokyo, who specializes in energy-efficient housing.

Are construction companies required to install solar power in Japan?

However, small and medium-sized construction companies are not subject to this obligation. It is estimated that only half of the new buildings in Tokyo (40,000 to 50,000 units per year) will be subject to this obligation. Other cities in Japan are also starting to mandate the installation of solar power equipment.

This article covers considerations on Tokyo's new solar panel installation mandate, current energy generation challenges and examples from Germany's initiatives.

The system is designed to promote the improvement of the environmental performance of buildings by suppliers, who are obliged to install the panels, together with owners of custom ...
