-----  
Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Will PV demand increase in Southeast Asia by 2028?

PV demand in Southeast Asia is expected to rise by over 70% by 2028, but issues remain regarding grid capacity, slow approvals, and policy hurdles. Governments must enhance cooperation, upgrade grids, and accelerate projects to support the energy transition.

Will Vietnam become Southeast Asia's largest renewable power market?

According to the IEA, based on today's deployment plans, Vietnam will remain Southeast Asia's largest renewable power market by a wide margin. The country's efforts to equip half of the office buildings and homes with rooftop solar panels will prove crucial for this development.

Could Singapore sit at the 'core' of new energy grids in Southeast Asia?

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, with proposed interconnections to neighbouring countries set to bring 25GW of new renewable power and energy storage projects online. This is according to Rystad Energy, which published a report into Singapore's role in the Southeast Asian energy mix this week.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate energy storage with new solar capacity, which is a crucial move for delivering stable ...

Bangkok, Thailand - July 1, 2025 -- The highly anticipated 4th Solar Energy Storage Future Asia Conference successfully took place in Bangkok. Hosted by Energy Box, ...

Enter energy storage, which acts like a "time machine" for electricity. For example, China's 2023 energy storage boom saw 3.5GW of new capacity added in June alone, largely ...

From Q4 2025, China will cancel the 13% VAT rebate previously applied to exports of solar modules and storage systems. With China supplying over 80% of global solar modules and ...

Singapore has advanced plans to import 1.4GW of solar and energy storage capacity from Indonesia in the last year. Image: Sunseap. Singapore could sit at the "core" of ...

Delve into the rising tide of energy storage in Asia. Discover how battery systems, pumped hydro, and thermal storage are revolutionizing the power landscape, driving Asia ...

According to Indonesia's Ministry of Energy and Mineral Resources, 14.7 GW of potential floating PV capacity offer growth opportunities. PV demand in Southeast Asia is ...
