When is the best time to buy solar panels?

Just like buying a house, solar is a long-term investment and there's more to be lost than gained by trying to time the market. The best time to buy solar panels is when you are ready to make an investment in your future. However, if you are trying to choose a time of year to start your search, fall and winter provide some unique advantages.

Are solar panels a viable option?

Solar panels are more affordable now than ever, with prices dropping by as much as 70% since 2014. On top of that, many states are now offering lucrative incentives for homeowners who go solar. As a result, renewable energy systems and solar panels are a viable option for many homeowners for the first time since their inception.

Is solar a good option for your home?

Like most industries, residential solar has its busy and slow seasons. Summer is typically the busiest time of year because with the sun shining, air conditioners humming, and peak utility rates in effect, homeowners get their biggest electricity bills of the year and react by switching to solar.

When is the best time to install a solar energy system?

Solar companies are most busy during the height of summer, pushing more ads and doing the most installations and repairs during this time. As a result, you may wait several weeks before your solar energy system can be installed, even longer in high-traffic states like California, Texas, or Arizona.

Spring and autumn offer a balanced solar output -- not as high as summer, but often more efficient in terms of panel performance. Cooler temperatures mean less heat loss in ...

Summer offers the best solar power with long, bright days, while winter challenges your system with shorter
