Why should you choose a Bess energy storage system?

Designed for various applications, from off-grid power to backup solutions, our BESS helps optimise energy use, reduce costs, and improve system reliability. With scalable and flexible options, our energy storage systems offer seamless integration, ensuring a continuous, stable power supply.

How much power does a Bess facility deliver in Queensland?

BESS facilities in Queensland (in operation, under construction, and proposed for development) have the ability to deliver between 10 - 500 megawatts (MW) of power and play a crucial role in stabilising the energy network.

What is a Bess battery system?

These battery systems provide reliable power with minimal setup, offering flexibility for changing site requirements. Containerised Battery Units: Built into secure, weather-resistant containers, these BESS systems are engineered for high-capacity, industrial-scale power storage.

What is 640mwh energy storage project?

640MWh energy storage project, one of the large-scale energy storage projects in Queensland. First project to be constructed using 5MWh energy storage containers in Australia with 25 years warranty. Partners with INTEC Energy Solutions to deliver full EPC solutions and 25 years of operation and maintenance services.

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 60 KW to 200 KW, to suit a wide range of industrial and commercial ...

Akaysha Energy has signed a long-term purchase agreement with Gunvor Group for a 205 MW/410 MWh battery energy storage system (BESS) in Brendale, Queensland. This ...
