Do smart locks need batteries?

Yes, smart locks require batteries since they are battery-powered. It is also one of the advantages of smart locks since it doesn't rely on electricity, so even if there's a power outage, your smart lock will still function properly.

What is the best type of battery for smart locks?

What happens if a smart lock battery dies?

A dead smart lock battery could compromise your home's security. Without the smart lock operational, you may need to rely solely on physical keys, potentially increasing the risk of unauthorized entry if you lose your key. Some smart locks may not provide sufficient low battery warnings, leaving you unaware of the impending battery failure.

How do you replace a battery in a smart lock?

Most smart locks have a battery compartment on the inside of the door. You may need to remove a cover or panel to access the batteries. Remove the old battery and replace it with a new one. Be sure to match the polarity (+ and -) according to the markings inside the compartment.

What should I do if my Kwikset smart lock battery dies?

Consider using an alternate entry point if your Kwikset smart lock's battery dies. Look for an open window or a back door that isn't locked to gain access to your home. Once indoors, you can easily replace the batteries in the lock, restoring its functionality. However, avoid causing any damage, like breaking a window, to enter your premises.
